

# 4 process DIGITAL LABELS

OPTIMIZE YOUR PROCESSES THROUGH THE  
DIGITALIZATION OF YOUR SUPPLY CHAIN

POWERED BY

**e-shelf-labels**

Industry 4.0:  
digitalization in  
Logistics & Manufacturing

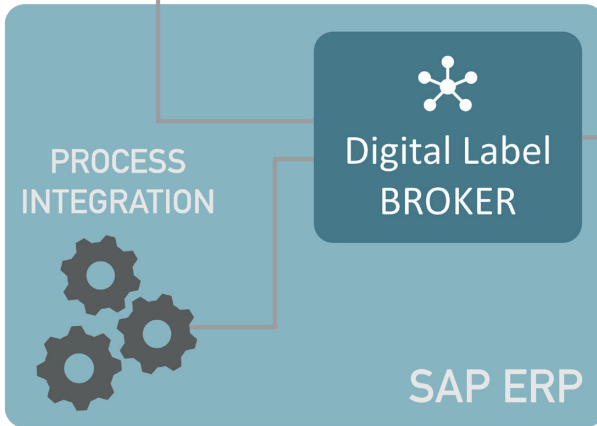

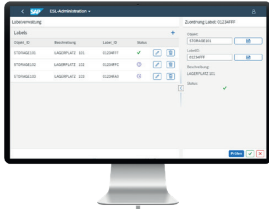

Full procedural  
integration into your  
SAP ERP system

Framework as  
implementation  
accelerator

Paperless processes  
Out-of-the-box integration  
Real time data

- **Production support:**  
Use the connection of your SAP ERP system with digital labels in order to be informed within your manufacturing process at any time about the current processing status and the progress of your production.
- **Traceability and labelling in your supply chain:**  
Keep the labelling of your containers or work pieces up up-to-date at all times, e. g. with material information and destination.
- **Marking of storage locations:**  
Equip your storage locations with dynamic information. Display which materials are stored in the respective location or point out special detailed information.

## LABEL ASSIGNMENT

### Special features of the solution:

- Simple and dynamic integration of labels
- Quick incorporation into standard processes
- Flexible integration into complex individual processes
- Protection of the processes through feedback of defective labels into your ERP system
- Future-proof also for SAP S/4HANA On-Premise and Cloud

# Your SAP experts with Gold Partner status:

As a full-service provider we support our customers throughout the entire life cycle of an implementation: from process analysis to customizing to permanent change management as well as hosting and support.

Our customers include both medium-sized companies and globally operating companies. Consistent long lasting customer relationship and an exceptional customer satisfaction differentiates the 4process AG.
